# INVITATION

Dear friends and colleagues,

It is our great honour to invite you to attend the first **World Conference on Electromagnetic Non-destructive Testing (WCEMNT 2025)** to be held in **Xiamen**, China from **November 18 to 22, 2025**.

With its theme of "**Electromagnetic Vision for Intelligent Safety Protection: A New Era of Global Electromagnetic Non-destructive Testing Technology**", WCEMNT 2025 has meticulously planned a diverse range of activities, including cutting-edge academic keynote lectures, oral and poster presentations, ISO international standard symposium, and exhibitions of advanced NDT equipment.

WCEMNT 2025 is committed to breaking through the limitations of traditional electromagnetic testing techniques such as the eddy current testing, the magnetic flux leakage testing etc. This international conference is aimed at developments of innovative non-destructive testing/monitoring system based on electromagnetic fields, with a focus on the following key aspects:

1. Deeply expand the interdisciplinary technology matrix including the microwave testing, terahertz wave imaging, and electromagnetic-electrochemical collaborative sensing.
2. Horizontally promote the integrated innovation of electromagnetic technology with multiple non-destructive testing methods such as ultrasonic guided-wave testing, laser holography, and infra-red thermography.
3. In the face of the wave of Industry 4.0, experts and scholars from fields such as artificial intelligence (AI), robotics, and biological electromagnetic fields are invited to gather together to drive progress in these critical fields.

WCEMNT 2025 is expected to attract **more than 300 experts and scholars engaged in electromagnetic non-destructive testing and related fields from more than 20 countries and regions, as well as over 50 domestic and international instrument manufacturers**. Currently, the conference preparation work is progressing steadily. A wealth of cooperation resources are now specially open, including **sponsorship titles, corporate brand displays, gold-level booth reservations, technical promotion**, etc. These diversified cooperation methods can be flexibly customized according to your needs. We sincerely invite you to actively participate and jointly promote the development and innovation in the field of electromagnetic non-destructive testing!
